Feels good to support my local bookstore

As much as I like physical books, most of the reading I do is actually audiobooks on my commute and I finally asked my local bookstore (Volumes in Chicago!) if I could somehow buy audiobooks from them. They directed me to this app and I'm so happy that (most of) my book-buying now supports them instead of the online giant.

Excellent platform

Just as good as Audible. Great that percentage of sales go to the independent bookseller of your choice.

I am a huge fan of Libro.fm!

One of my favorite things to do is browse the sale section, and purchase any books that look interesting to me. I highly recommend!
